Summary

I am a versatile professional with expertise in competitive programming, community management, and web development. I have worked as a Community Manager at Stack Learner, founded Programming for Career, and served as a Social Media Manager at CPS Academy and Stack Learner. As a YouTuber, I create educational content for competitive programmers and web developers in English and Bengali. I aspire to become a Full-Stack Web Developer, COO, or CEO, while continuously expanding my expertise and making a meaningful impact.

Projects

CLI Based Note Taking App

🔗 <https://github.com/maruf-pfc/cli-based-note-taking-app>

This is a simple command-line interface application that allows users to create, view, update, and delete notes. It also supports user registration and login functionality.

QuickGen

🔗 <https://github.com/maruf-pfc/QuickGen>

A powerful desktop application built with Java Swing for quick project scaffolding and template generation.
